

The main feature of our axle play detector is the robustness of the elements generally of biggest wear. In this case the covers with an overmeasured thickness to prevent deformations and the diamond-metal surface offers a resistance to wear and an adherence bigger to any option of the market. Presented in two options, 6 Movements and 8 Movements.

### Technical Specifications

<b>Size (mm.)</b>	<b>626x626</b>
<b>Max. Axle Weight</b>	<b>3.500 Kg</b>
<b>Working Pressure</b>	<b>120 Bar</b>
<b>Movement Plate 1</b>	<b>Travers</b>
<b>Movement Plate 2</b>	<b>Travers and Longitude</b>
<b>Displacement Power</b>	<b>1.260 Kg</b>
<b>Power Supply</b>	

**3 x 230 V / 3 x 400V**  
**50 / 60 Hz**

## **Options**

- **6 Movements**
- **8 Movements**
